Dear Hiring Manager,

Having worked within the industry for over 12 years, I have developed a wide range of skills that would meet, and likely exceed expectations. In my present role as a Project Manager 4 for GIT Change Management at Oracle, I have acquired substantial experience and understanding of not just our team but also a large number of dependent organizations.

As an ITIL certified person, I helped creating guidelines for many key management practices in our organization such as incident, change, problem, release, quality and knowledge base management using this framework.

By participating in different Global projects in my current position I have received the Team Brilliance Award on the last 2 Quarters (Q2FY17 and Q3FY17) for my participation and engagement

As well I have recently receive the Pacesetter Award for Q1FY18 for my participation on a Data Center segregation program

In addition to possessing a strong technical background, I am very self-motivated, always curious, and an extremely hard worker.

I can provide references upon requests from my previous and current manager

I have an open work permit and a valid SIN to work in Canada

After reviewing the attached resume, I'll be hearing from you to discuss my qualifications and how I will contribute to your group.

Sincerely,

Juan Aguas
